|                                                                                                                                                                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| WOLFRAM E. SAMLOWSKI, BRUCE A. BRAATEN, AND RAYMOND A. DAYNES. Characterization of the <i>in Vitro</i> Interaction of PNA <sup>hi</sup> Lymphocytes with the Bone Marrow and Hepatic Asialoglycoprotein Receptors .....                                                                                         | 1   |
| HOWARD D. EPSTEIN, DEANNA S. MITCHELL, JOAN S. HUNT, AND GARY W. WOOD. Ia-Positive Macrophages Bind and Internalize Viable Lymphocytes in Murine Thymus .....                                                                                                                                                   | 15  |
| KUNISUKE HIMENO, AKIRA YAMADA, HIROSHI MIYATA, FUMIO NANISHI, AND KIKUO NOMOTO. Antigen-Specific Augmentation of Delayed-Type Hypersensitivity by Immune Serum Factor in Mice .....                                                                                                                             | 35  |
| B. WRIGHT, I. ZEIDMAN, R. GREIG, AND G. POSTE. Inhibition of Macrophage Activation by Calcium Channel Blockers and Calmodulin Antagonists .....                                                                                                                                                                 | 46  |
| P. S. CROSIER, E. J. SIMPSON, AND P. R. MACDONALD. Regulation of Human Cytotoxic T-Lymphocyte Responses by a Soluble Suppressor Factor .....                                                                                                                                                                    | 54  |
| THERESA L. GERRARD, DAVID J. VOLKMAN, CYNTHIA H. JURGENSEN, AND ANTHONY S. FAUCI. Activated Human T Cells Can Present Alloantigens but Cannot Present Soluble Antigens ..                                                                                                                                       | 65  |
| MARIE-LISE GOUGEON, GEORGES BISMUTH, AND JACQUES THEZE. Differential Effects of Monoclonal Antibodies Anti-L3T4 and Anti-LFA1 on the Antigen-Induced Proliferation of T-Helper-Cell Clones: Correlation between Their Susceptibility to Inhibition and Their Affinity for Antigen .....                         | 75  |
| HALINA OFFNER AND ARTHUR A. VANDENBARK. Gangliosides Inhibit Phenotypic and Functional Properties of an Encephalitogenic T-Helper Lymphocyte Line .....                                                                                                                                                         | 84  |
| VINCENT J. MERLUZZI. Comparison of Murine Lymphokine-Activated Killer Cells, Natural Killer Cells, and Cytotoxic T Lymphocytes .....                                                                                                                                                                            | 95  |
| JEFFREY S. BERMAN, WILLIAM W. CRUIKSHANK, DAVID M. CENTER, ARTHUR C. THEODORE, AND DENNIS J. BEER. Chemoattractant Lymphokines Specific for the Helper/Inducer T-Lymphocyte Subset .....                                                                                                                        | 105 |
| REUVEN TIROSH AND GIDEON BERKE. T-Lymphocyte-Mediated Cytolysis as an Excitatory Process of the Target. I. Evidence that the Target Cell May Be the Site of Ca <sup>2+</sup> Action .....                                                                                                                       | 113 |
| NOBUHIRO NORO, SEISHI KYOIZUMI, JUNJI YODOI, AND TOHRU MASUDA. Synergistic Interaction of a Cytokine Produced by Embryonic Fibroblasts and a Lymphokine Contained in Con A-Stimulated Spleen Cell Culture for Murine Macrophage Differentiation: A Model Experiment Using Cell Line Cells, M <sub>1</sub> ..... | 124 |
| ISAO TAKATA, MARK R. GORDON, AND QUENTIN N. MYRVIK. Demonstration of a Macrophage Migration Enhancement Factor in the Sera of Young Rabbits .....                                                                                                                                                               | 137 |
| CHAIM M. ROIFMAN, GORDON B. MILLS, MARY CHU, AND ERWIN W. GELFAND. Functional Comparison of Recombinant Interleukin 2 (IL-2) with IL-2-Containing Preparations Derived from Cultured Cells .....                                                                                                                | 146 |
| SHERMAN FONG, TIMOTHY A. GILBERTSON, ROBERT J. HUENIKEN, SHARWAN K. SINGHAL, JOHN H. VAUGHAN, AND DENNIS A. CARSON. IgM Rheumatoid Factor Autoantibody and Immunoglobulin-Producing Precursor Cells in the Bone Marrow of Humans .....                                                                          | 157 |
| JOHN D. CONGER, GEORGE K. LEWIS, AND JOEL W. GOODMAN. Idiotypic Properties of the Murine Anti-arsenate Antibody Response: B- and T-Cell Influences .....                                                                                                                                                        | 173 |
| HUYNH THIEN DUC, RADSLAV G. KINSKY, PAULETTE MONNOT, AND GUY ANDRÉ VOISIN. Evolution of Alloantibodies and Suppressor Cells in Allografted Mice Treated for Passive Enhancement .....                                                                                                                           | 180 |
| SHORT COMMUNICATION                                                                                                                                                                                                                                                                                             |     |
| ALVAR GRÖNBERG, ROLF KIESSLING, AND WALTER FIER. Interferon- $\gamma$ Is a Strong Modulator of NK Susceptibility and Expression of $\beta$ 2-Microglobulin but Not of Transferrin Receptors of K562 Cells .....                                                                                                 | 195 |
| PAPERS TO APPEAR IN FORTHCOMING ISSUES .....                                                                                                                                                                                                                                                                    | 203 |
